

Gable Roof Terms

Shed Roof Terms

Notes

Maximum lengths and widths of total structure (house and porch combined) are 24'.

One simple porch is allowed in calculations. It can be located at either the front, rear, or one side.

Wrap-around porches are not allowed.

Porch can either be uncovered, or share the roof with the main house.

For a separate porch roof, omit the porch entirely from the house estimate, and do a separate porch estimate.
